

First Aid

Approved Protection Systems

Since 1929

Do you have a first aid cabinet? Are the items in your first aid cabinet expired or is it empty and needs to be restocked? Is your first aid cabinet OSHA compliant? Do you need an eyewash station? Let Approved Protection Systems help you with all your first aid needs!

Services

Approved Protection Systems can provide your company with high quality first aid cabinets, supplies, and specialty kits to provide greater worker safety and full OSHA compliance.

- Based on an initial consultation we will make recommendations for the First Aid supplies and service that will ensure the safety of your employees as well as fulfill all OSHA requirements.
- Upon installation of the first aid cabinets and/or eyewash stations, we can set up a custom service schedule, based on your company's usage. At every service appointment we will restock the cabinet as well as check for out-of-date products.
- Approved Protection Systems will bar code and record all the inspections and maintenance we perform on the first aid product lines which will help you keep track of AED pad/battery replacement dates, eye wash station recharge dates, first aid product dates and more.

Products

With our combination of products and services your employees will be healthier and more productive. For first aid products Approved Protection Systems has chosen to partner with Green Guard. Green Guard's commitment to quality is unmatched within the industry.
