

BuildingReports Service Description

Approved Protection Systems

Since 1929

Real-time data and on-demand reports!

When your new Approved Protection Systems safety or security system is installed, each related device is stickered with bar-coded information. Your inspections are carried out by our licensed and certified technicians using hand-held PDAs or smart phones to scan and enter data about these bar-coded devices. This information is then securely transferred to our online database so you have immediate access to all your inspection reports.

Your inspection data is stored on our secure servers that are backed up daily and archived off-site so you always have access to your inspection reports. Should your system need troubleshooting or repairs, our licensed and certified technicians can scan the device to obtain its pertinent data.

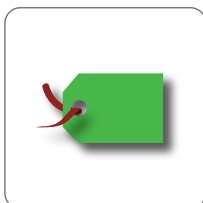

Inspection results are instantly retrievable 24/7 from any location for flexible property management. Approved Protection Systems delivers device specific reports with more detail than any other system, including:

- Executive Summary with inspection overview
- Colored Inspection Status Tags for immediate one-look indication
- Discrepancy Report showing manufacturer recalls and industry notifications
- Proposed Solutions with pricing and repair authorization
- Inspection & Testing with Date/Time of test verification for accountability
- Inventory & Warranty (aging) report

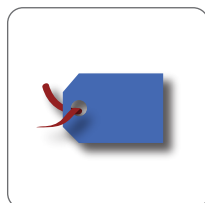

Unmatched accessibility puts your inspection reports at your fingertips to satisfy AHJs, Insurance Providers, and other facility management. Simply log on to the Approved Protection Systems website with your Customer ID and password to see a complete, easy-to-understand picture of where you are.

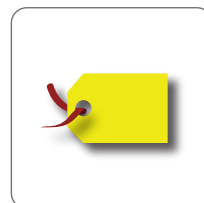

Building ID:	Status:	Building Name:	Inspection ID:	Date:	Docs:
303808		GHR - Plant 1	864261	11/23/2014
